| <b>2026</b>                                          |                                                                                                                                                                                                                                                                                                  |               |
| 1.                                                   | <b>Karabašević, D.</b> , Vujko, A., Mirčetić, V., Cvijanović, D., & Stanujkić, D. (2026). Synthetic Nature: The Emotional Ecology of AI-Generated Landscapes in Sustainable Tourism. <i>Sustainability</i> , 18(5), 2330.                                                                        | 3.3           |
| 2.                                                   | <b>Karabašević, D.</b> , Vujko, A., Mirčetić, V., Popović, G., & Stanujkić, D. (2026). A Transformer-Based Semantic Encoding Framework for Quantitative Analysis of Large-Scale Textual Reviews. <i>Axioms</i> , 15(3), 175.                                                                     | 1.6.          |
| 3.                                                   | Vujko, A., Perović, N., Mirčetić, V., Radosavac, A., & <b>Karabašević, D.</b> (2026). AI Transparency and Climate-Adaptive Agritourism: Farm-Level Decision-Making and Rural Resilience. <i>Agriculture</i> , 16(4), 404.                                                                        | 3.6           |
| 4.                                                   | Veljić, A., Viduka, D., Ilić, L., Šijan, A., & <b>Karabašević, D.</b> (2026). Trends and Networks in the Application of MCDM Methods in Computer Science: Analysis of the Web of Science Database. <i>International journal of electrical and computer engineering systems</i> , 17(3), 241-255. | 0.9           |
| <b>2025</b>                                          |                                                                                                                                                                                                                                                                                                  |               |
| 5.                                                   | Yasmin, S., Qiyas, M., <b>Karabasevic, D.</b> , & Khan, N. (2025). 2-tuple linguistic complex intuitionistic fuzzy aggregation operators and their application in decision making problem. <i>Engineering Applications of Artificial Intelligence</i> , 158, 111342.                             | 8.0           |
| 6.                                                   | Qiyas, M., Khan, N., <b>Karabasevic, D.</b> , & Alvi, M. L. (2025). Decision support model under the fractional orthotriple fuzzy information. <i>Engineering Applications of Artificial Intelligence</i> , 144, 110114.                                                                         | 8.0           |
| 7.                                                   | Popovic, G., Stanujkic, D., Mihic, M., Smarandache, F., <b>Karabasevic, D.</b> , & Mircetic, V. (2025). The single-valued Neutrosophic extension of the PIPRECIA method. <i>Knowledge-Based Systems</i> , 315, 113271.                                                                           | 7.6           |
| 8.                                                   | Veljić, A., Viduka, D., Ilić, L., <b>Karabasevic, D.</b> , Šijan, A., & Papić, M. (2025). Sustainable Decision-Making in Higher Education: An AHP-NWA Framework for Evaluating Learning Management Systems. <i>Sustainability</i> , 17(22), 10130.                                               | 3.3           |
| 9.                                                   | Cvijanović, D., <b>Karabašević, D.</b> , Vujko, A., Vukotić, S., Popović, G., & Mirčetić, V. (2025). The Future Is Community-Led: Rethinking Rural Tourism Sustainability Through the Bregenzerwald Model. <i>Sustainability</i> , 17(12), 5450.                                                 | 3.3           |
| 10.                                                  | Vujko, A., <b>Karabašević, D.</b> , Panić, A., Arsić, M., & Mirčetić, V. (2025). AI Transparency and Sustainable Travel Under Climate Risk: A Geographical Perspective on Trust, Spatial Decision-Making, and Rural Destination Resilience. <i>Sustainability</i> , 17(24), 11200.               | 3.3           |
| 11.                                                  | Nematian, J., Stanimirović, P. S., Ghorbani, S., <b>Karabašević, D.</b> , & Brzaković, P. (2025). A Maximal Covering Location Problem Under Uncertainty Through Possibility Theory. <i>Mathematics</i> , 13(22), 3653.                                                                           | 2.2           |
| 12.                                                  | Mojsilović, M., Pepić, S., Popović, G., Saračević, M., & <b>Karabašević, D.</b> (2025). Application of Soft Computing Techniques in the Analysis of Educational Data Using Fuzzy Logic. <i>Mathematics</i> , 13(13), 2096.                                                                       | 2.2           |
| 13.                                                  | Khan, N., Qiyas, M., <b>Karabasevic, D.</b> , Ramzan, M., Ali, M., Dugonjic, I., & Stanujkic, D. (2025). Spherical Fuzzy Credibility Dombi Aggregation Operators and Their Application in Artificial Intelligence. <i>Axioms</i> , 14(2), 108.                                                   | 1.6           |
| 14.                                                  | Ulutaş, A., Topa, A., <b>Karabasevic, D.</b> , Zavadskas, E. K., Demirbaş, M., & Üre, S. (2025). A Novel Grey MCDM Model Assessing Macroeconomic Performance of G7 Countries. <i>Journal of Grey System</i> , 37(3).                                                                             | 1.5           |
| <b>2024</b>                                          |                                                                                                                                                                                                                                                                                                  |               |
